

Assignment 1: Git & GitHub Fundamentals

Tools she must use:

- Git
- GitHub
- Visual Studio Code

Goal:

Understand the **basic Git workflow** used in professional development.

Task 1 — Install Required Tools

She should install:

1. **Git**
2. **Visual Studio Code**

Then configure Git identity:

```
git config --global user.name "Name"  
git config --global user.email "email@example.com"
```

Verify:

```
git config --list
```

Task 2 — Create GitHub Account

Create an account on:

- GitHub

Then create a repository named:

```
python-developer-journey
```

Repository settings:

- Public
- Add README
- Add .gitignore (Python)
- Add MIT License

Task 3 — Clone the Repository

Clone the repository locally.

Example:

```
git clone https://github.com/username/python-developer-journey.git
```

Enter the project directory:

```
cd python-developer-journey
```

Verify:

```
git status
```

Task 4 — Create Project Structure

She must create this structure:

```
python-developer-journey/  
|  
├── README.md  
├── lessons/  
│   └── lesson1.md  
|
```

```
└─ exercises/  
   └─ git-notes.md
```

Task 5 — Update README

Edit `README.md` to include:

```
# Python Developer Journey
```

This repository documents my journey learning Python and software development.

```
## Goals
```

- Learn Git and GitHub
- Learn Python programming
- Build real projects

```
## Author
```

```
<Your Name>
```

Task 6 — Make the First Commit

Commands:

```
git add .  
git commit -m "Initial project structure for Python learning journey"
```

Check history:

```
git log
```

Task 7 — Push to GitHub

Push changes:

```
git push origin main
```

Verify that the repository on GitHub contains the files.

Task 8 — Create a Feature Branch

Create a branch:

```
git checkout -b feature/git-notes
```

Edit the file:

```
exercises/git-notes.md
```

Add notes about:

- What is Git
- What is GitHub
- What is a commit

Task 9 — Commit the Branch

```
git add .  
git commit -m "Add Git learning notes"
```

Push the branch:

```
git push origin feature/git-notes
```

Task 10 — Create Pull Request

On GitHub:

Create a **Pull Request** from:

feature/git-notes → main

Add description:

This PR adds my Git learning notes.

Merge the PR.
